## Functionality to show more contact information in public WHOIS

.It registrants now have ability to specify which additional contact information to show in WHOIS, the settings can be changed via [registrant site](#).

To protect personal data only minimal registrant information is shown by default (for natural persons only email and initials are visible in public WHOIS).

2012-01-12

## ICANN starts accepting new gTLDs applications

Starting today, ICANN begins accepting applications for new generic top-level domains (gTLDs). The world of .com, .gov, .org and 19 other gTLDs will soon be expanded to include all types of words in many different languages. For the first time generic TLDs can include words in non-Latin languages, such as Cyrillic, Chinese or Arabic.

## Information DNS movie

Domreg.It presents information movie explaining how DNS system works

## Additional IPv6 DNS address

In effort to improve IPv6 reachability, Domreg.It has started announcing additional IPv6 address (for **c.tld.lt**), currently three out of five DNS server groups are serving clients using both IPv4 and IPv6:

- b.tld.lt - 2001:678:19::1
- c.tld.lt - 2001:678:4::4
- d.tld.lt - 2001:678:6::1

## New .It DNS servers anycast cloud

Due to continuous effort to strengthen DNS infrastructure, .It registry is happy to announce new DNS *anycast* cloud **b.tld.lt**. There are currently three .It DNS server clouds (b.tld.lt, c.tld.lt, d.tld.lt). Using *anycast* technology multiple servers share single IP address, client requests are resolved by the closest one.

**b.tld.lt**

## Changes in procedural regulation for top-level .It domain

The procedural regulation for top-level .It domain will be updated as of Nov. 1st of 2009.

The main change is .It domains pricing policy: since 2009-11-01 discounts policy (based on registrar domain count and growth) will no longer be used, instead same-price policy will be adopted.

[Detailed description of all changes](#)

2009-04-06

## 100 000 .It domains milestone reached

Domreg.It, the .It domain registry, is proud to announce the milestone of **100 000** registered .It domains. This number of .It domains was reached just over two years after new .It registry system deployment. Variuos .It top level domain statistics can be found in [our report](#).

2009-01-15

## IDN domains

Currently registered IDN domains (names, which contain letters with [diacritical marks](#)) account for %1 of all .It domains. According to our calculations, about half of lithuanian words contain letters with diacritical marks, based on this fact we expect IDN domain count to further increase.

## 80000 .It domains

On 2008-06-13 number of registered .It domain has reached 80000. During last 8 months the .It registry has grown by 20000 domain names.

Domreg.It has created public [.It usage analysis](#) for this watermark.

2008-03-19

## .It domain is now accessible through IPv6 protocol

.It domain name is accessible using IPv6 protocol since 9 March, 2008. This is one of the .It domain registry planned DNS service infrastructure upgrades, to facilitate internet users and internet service providers who are using or want to start using IP version 6 protocol.

After successful launch of new service, .It domain DNS servers with IPv6 support have quite small, but steady DNS query traffic. This proves that demand for launched new service is real.

2008-03-13

## New .It registry system is up for one year

New .It registry system is online since 2007-03-13 13h. Since then, .It domain count has grown from [45000 to 72000](#) (60% growth). Currently, .It domain count grows by [more than 500](#) every week.

We are glad, that more registrars are choosing automated [EPP](#) interface (more than 3 million EPP operations per year) and use fast DAS service to check domain availability.

2008-03-05

## .It anycast DNS servers

.It zone is now serviced by new [c.tld.It anycast](#) DNS servers cloud (seven instances in variuos foreign countries).

2007-12-19

## Merry Christmas and a Happy New Year

2007-10-18

### .It Registrations exceed 60000

Number of registered .It domains has passed 60000 mark on 2007-10-18. .It registry has grown by 10000 .It domains since 2007-05-14.
